

Accelerate your way to being a software defined company in a hyper-connected world

“Relevance Lab’s RL Catalyst is your vehicle to ride the DevOps route to automation, innovation and market disruption.”

“It’s a given. Engineering and IT Ops teams get blindsided by the lack of automation.”

- 🕒 go-to-market gets delayed
- 🕒 quality testing gets into an endless loop
- 🕒 capacity and budgets get into freefall
- 🕒 lack of innovation in driving market disruption

With RL Catalyst, automate your infrastructure with a software-defined paradigm. Move away from proprietary stacks, engineer apps for the cloud, derive more value from your existing tools and do a whole lot more. Align goals and behaviour across your organization with a high trust, empowered culture and a structured platform that makes doing the right thing easy.

"RL Catalyst is your definitive intelligent DevOps platform for business transformation."

Enterprises, ISVs, System Integrators and companies operating in the new age on-demand economy use RL Catalyst to accelerate time-to-market, ensure SLA/OLA compliance, track asset capacity (manage phantom capacity), transform products and create disruptive business models.

Powered by Chef, RL Catalyst comes built-in with:

- 🕒 **Automation and Optimization** for Hybrid Infrastructure with Integrated Actionable Monitoring.
- 🕒 **"Software Aware Element"** that drives software-defined configurations.
- 🕒 **Command & Control center** with a 360 degree view and actionable insights.
- 🕒 **Self-remediation and Self-service** capabilities.
- 🕒 **Out-of-box integration** with existing CI/ CD/ITIL tools such as Chef, Docker, Jira, Jenkins, GitHub, ServiceNow and others.

Realize superior RoI by maximizing existing investments and scaling at lower costs. Empower your workforce, boost productivity, and deliver your products faster. Now track Cost, Usage, Uptime, Downtime and System Health in real-time.

RL Catalyst – from the DevOps Specialists

RL Catalyst is designed to adapt to your needs. Choose your preferred variant:

RL Catalyst Open Source

drives rapid adoption and co-creation of “DevOps and IT Ops Solutions” with community collaboration.

RL Catalyst Enterprise

helps accelerate transition to a fully managed model for optimization of planning, usage and costs across data centers and cloud.

RL Catalyst Hosted

kick-starts your DevOps journey with zero overheads and tailor made solutions.

Check out our Open Source version:
