**Blockchain/Cryptocurrency**

industry and looking for the right Dev/Test  
/DevOps partner?

<https://relevancelab.com/>

## **Look no further!**

Relevance Lab has the right mix of skills to meet your needs, having worked with start-ups and enterprises in this area

# Who We Are

Relevance Lab is a global software services consulting company focused on Cloud migration, DevOps automation, Data engineering, App modernization, and custom software development.

**Use Case:** Silicon Valley Start-up

**Key Focus Area:** Blockchain and Cryptocurrency based technologies

**Our Work:**

- Dev/Test/DevOps services for products that secure keys of assets on any blockchain and records/coordinates settlements between institutional players
- Relevance Lab's Data engineering teams have created blockchain POC's in the enterprise supply chain ERP's

- Distributed development capabilities spread across North America (US/Canada) & India (Bangalore) for optimal cost benefits
- To help with their Digital Transformation efforts, we set up Extended Development Centers for many start-ups with the injection of specialists in:
  - Cloud migration (AWS/Azure/GCP)
  - DevOps (CI/CD with Jenkins, Harness, etc., Container implementation with Docker /Kubernetes, Configuration management with Chef/Puppet/Ansible, Monitoring with Splunk /Logstash/SumoLogic/etc)
  - Test automation
  - Data analytics (Hadoop/Snowflake/Databricks Informatica/classic BI/Data warehousing)
  - Microservices
  - Digital app development
  - Infrastructure management
- Our work with these clients has resulted in a high degree of efficiency gains and cost savings

Development made effortless for  
**Blockchain & Cryptocurrency**  
companies
